**EXCITING POSITION IN SOCIAL NEUROSCIENCE:  
WILLIAMS SYNDROME, A MODEL FOR LINKING SOCIAL PHENOTYPE, NEURAL SYSTEMS AND  
MOLECULAR GENETICS**

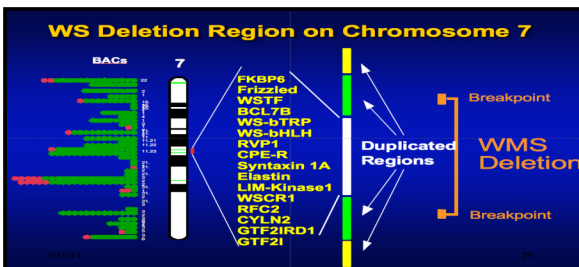

Accepting applications for a talented Post doctoral Research Scientist at the Laboratory for Cognitive Neuroscience at the Salk Institute for Biological Studies as part of a newly funded NIH funded Program Project. Researcher will have a lead role in characterizing the social-affective behavior of Williams Syndrome (WS), a genetically-based disorder with an unusual social phenotype. We are seeking an innovative individual in cognitive or social neuroscience with expertise in ERP, Psychophysiology, eye tracking, other brain imaging and experience in experimental design and analysis of on-line measures of processing. Position also involves collaborating with a group of investigator and supervising research assistants. For more information on the lab research, see our website at <http://www.lcn.salk.edu> (Position available immediately).

**Position Requirements**

Doctoral degree in Cognitive Psychology, Cognitive Neuroscience, Neuropsychology, or other neuroscience-related fields and strengths in statistical analysis are required. Knowledge of Matlab, Netstation, E-Prime, Acknowledge, SPSS, SAS, Psyscope are preferred. Four or more years of research experience and peer-reviewed publications are required. Strong interpersonal skills and experience working with developmentally delayed populations and a clinical background is considered a plus.

**Laboratory for Cognitive Neuroscience  
Dr. Ursula Bellugi, Director and Principal Investigator**

The Salk Institute offers excellent benefits. Salary based on background and research experience. For full consideration, qualified candidates should apply by submitting a Letter of Research Interest, a current CV, names of three references and publications to: The Salk Institute, Attn: Patricia Fillet - 10010 North Torrey Pines Road, La Jolla, CA 92037 or by email: [pfillet@salk.edu](mailto:pfillet@salk.edu).
