

# Can you make the difference?

Artinis Medical Systems is an innovative, dynamic and globally operating company in the Netherlands. Artinis is a global market leader in image quality assessment of x-ray devices and near-infrared spectroscopy devices used to monitor tissue oxygenation. Our leading (portable) NIRS-devices are used in renowned institutes and universities worldwide e.g. in cognitive and clinical neuroscience, brain computer interface and sport science. To continue our growth as a company, we are looking for an:

## Application Specialist Research Devices

Are you excited about innovative medical products, and do you feel comfortable in a personal company where your input will make a difference? Do you have an appropriate Master Degree (WO)?

### Your responsibilities?

Within Artinis you will work with highly innovative (medical) instruments. As application specialist you will give demonstrations to potential customers and be responsible for sales, instruction and after sales. You will also provide user feedback used for the development of new products. Within the different international projects in which we participate your role will be to assist our partners in data acquisition and data analyses.

### Main tasks?

- You are responsible for sales and after sales of our NIRS devices;
- You maintain contact with our customers and potential customers;
- You represent Artinis at international exhibitions;
- You create and develop new extensions and products based on our core technology;
- You visit our international customers for demonstrations and training;

### Our expectations

- You have a background in the medical-technical field on WO level;
- You have excellent verbal and written communication skills in English and Dutch;
- You are able to translate medical scientific issues into product specifications;
- You are enthusiastic, flexible and can function properly in a small multi-disciplinary team;
- You have a commercial attitude;

### We offer

- A varied job which allows for independence, personal input and responsibility;
- The possibility to break new grounds;
- Space for personal development;
- An inspiring and pleasant work environment;
- Pension plan;
- A job for 32-40 hours/week;
- One-year contract;
- Competitive salary.
